About Me

I am a dedicated Industrial Engineer with a background in Finance and Operations, where I developed considerable analytical competencies and a extraordinary commitment to providing excellent customer service.

Looking to make a switch in my professional career into the world of technology, I've certified as Web Full Stack Developer, bringing forth a variety of highly demanded skills.

Passionate learner, hard worker, and ready to join my next team.

Work Experience

Finance Operations Analyst

SAP, *German multinational software corporation*

03/2020 - 02/2022

- Managed 80+ portfolio companies, ensuring correct invoicing and timely payment.
- Worked with interoperability between the different teams within the Finance sector (Q2C, O2C, R2R, P2P) and other related areas (Legal, Commercial, IT), developing a complete understanding of corporate finance and the company's end-to-end business process.
- Generated financial dashboards for the directives using Power BI

Business Analyst

Tenaris, *Global Manufacturer of steel pipes for Oil & Gas*

12/2018 - 03/2019

- Full-Time Educational Summer Practice in Siderca Industrial Plant (Campana, Buenos Aires).
- Key Project: digitalization of tubular services area (SETU) to reduce operating times and costs.
- Carried out the end-to-end survey (business process mapping As-is & To-be, Project Roadmap).
- Collaborated in the development of advanced features in the Tenaris Digital Portal and the consequent training of the operators for its use. Tracked their usability with KPIs in Power BI.
- Key Project Performance Evaluation: 5/5; Business Case was included in the Budget 19'/20'.
